Founded in 2002 in Izmir, Turkey, our company began its journey as a manufacturer and supplier of poly-woven dunnage bags.

To meet the growing demand in the European market, we later expanded our operations by establishing a new production facility in Portugal and setting up our European headquarters in Budapest, Hungary, following the opening of our second plant in Amasya, Turkey.

Our Caribbean and Latin American Sales Office is located in Barcelos, Portugal, allowing us to efficiently serve international clients across multiple regions. ABP has since then continued to expand its network by establishing new offices and warehouses in Germany, Italy and the United States of America!

Our manufacturing operations employ over 150 professionals, supported by more than a decade of experience in the extrusion and conversion of polypropylene and polyethylene products.

At ABP Airbag, we produce custom-designed multi-layer polyethylene films with thicknesses ranging from 80 to 200 microns, reaching a production capacity of 10,000 tons per year. Our PE blown film extrusion line is fully integrated into our dunnage bag production process, ensuring consistent quality and cost efficiency. This integration enables us to deliver high-performance products at competitive prices.

Our dunnage bags incorporate the latest technologies and features to help secure cargo safely, efficiently, and cost-effectively. In addition to dunnage bags, we manufacture inflators, spare parts, and air valves, and provide custom inflation solutions for all your cargo-securing needs.

Our production takes place
in a 10,000 m² facility.

PRODUCT RANGE

- L1 Eco:** Dunnage bag for truck shipments — light-duty, eco-friendly
- L1:** Dunnage bag for truck & container shipments — AAR verified
- L2:** Dunnage bag for truck, container & rail shipments — medium-duty
- L3:** Dunnage bag for rail & ocean shipments — heavy-duty
- L4:** Dunnage bag for rail & ocean shipments — extra-strong
- L5:** Dunnage bag for rail & ocean shipments — ultra-heavy loads
- Square bags:** For truck & container shipments — corner fit
- Twin bags:** For truck & container shipments — extra stability

All of our dunnage bags are made of PP & PE and 100% recyclable.

ABP Airbags

ABP Airbags has always viewed continuous improvement of company processes and complete customer satisfaction as essential factors for standing out in the competitive dunnage bags market. ABP Airbags has always aimed to become a preferred supplier in the industry.

ABP Airbags, with an experienced, competent and dynamic team, has wide range of equipment and test methods to fulfill your dunnage bag needs.

- Professional Manufacturing Process
- Environment and Occupational Health & Safety Applications
- Tensile Strength
- Tear Resistance
- Seal Strength
- Sensitive Digital Thickness and Weight Measurement
- Optical Density

Production Sites:

A) Amasya / Turkey Number of employees : over 100 Production Capacity : 400.000 dunnage bags/month Indoor area : 10.000 sqm.

Office Locations:

- A) Budapest/ Hungary
B) Barcelos / Portugal

Warehouses:

- A) Budapest / Hungary
B) Barcelos / Portugal
C) Modena / Italy

Air Bag Production
— ABP —

We have been manufacturing complete equipment solutions for dunnage airbags for over 12 years. As a global supplier, we provide a full range of dunnage bag inflators, air guns, and adapters for the dunnage airbag industry.

As an industry leader, we are committed to delivering the highest quality products and innovative solutions for dunnage bags. In addition, we manufacture dunnage airbag inflators and spare parts, offering comprehensive solutions for all your needs. With manufacturing facilities in Turkey and across the globe, we strive to ensure:

- Superior product quality and service
- Timely delivery
- Clear communication
- Continuous quality improvement

Air Bag Production

———— **ABP** ————

One of the most important factors in the development of the global world is international trade.

Producing and delivering high-quality products to their destinations is essential. Historically, during the Middle Ages, goods were transported by caravans between countries along routes such as the Silk Road. Since the beginning of trade, the transportation of goods has played a vital role, and today, global commerce is unimaginable without it.

Safe shipping starts with safe loading.

Any logistic activities whether it is at sea, road or rail involves a certain degree of risk. In general, it is difficult to estimate the damage caused by human or natural factors.

Air Bag Production
ABP

Potential damages amounting to tens of thousands of dollars can be prevented with a simple, low-cost method.

On average, a truck carries goods worth approximately \$50,000. With the help of Dunnage bags, which only require an investment of about \$50-80, you can protect your cargo and secure it!

Air Bag Production
ABP

Many people believe that insurance will cover any kind of damage which may occur during the transportation.

We all know that insurance companies are not always willing to pay or even if they pay, unfortunately it can take several months before you receive the money. Such an issues can be harmful for the both sides. Simple dunnage bag can be effective solution for your goods and by using dunnage bags you will be able to avoid the risk of complaints, claims and loss of trust. In the long run, it is easy and effective solution for your business.

Air Bag Production
ABP

ABP dunnage bags can guarantee the safety and integrity of your products in unforeseen scenarios such as truck accident.

Dunnage bags can be used for all types of transport vehicles and cargo. Including pallets, paper containers, drums, boxes, machinery, household appliances, electronic devices, application products, fresh fruit or canned goods.

Air Bag Production

ABP

Filling the gaps between goods in trucks, trains, or containers using alternative methods is not an effective solution.

ABP dunnage bags effectively fill and balance the spaces between the stacks. Their high-pressure capacity enables them to withstand the forces and pressures generated during transportation.

Dunnage bag usage instruction

1. Place the dunnage bag between 2 pallets, boxes or other objects.
2. Connect the inflator to the valve of the airbag (Figure 2).
3. Inflate the airbag while pressing the inflator's button (Figure 3).
4. When the air bag has reached the proper hardness, detach the gun from the valve on the dunnage bag (Figure 4).
